Saint Edward High School vs. Glenville	1/17/2026	Prepared by: Coach Donelon

Glenville enters our contest with an overall record of 8–5 and has been tested against stiff competition, having already faced St. Ignatius, Cleveland Heights, Garfield Heights, Hawken, and Lutheran East. They are a team that feeds off the crowd and the level of competition, so we should fully expect Glenville to be prepared to play us tough from the opening tip.

Offensively, Glenville looks to get out and score in transition whenever possible. In the half court, they rely heavily on dribble-drive action, drive-and-kick opportunities, and will mix in some zoom action to create advantages. Defensively, they will primarily play man-to-man and have shown token full-court man pressure to disrupt rhythm and force mistakes.

We must eliminate mental mistakes, take care of the basketball, and play with confidence and swagger. We are St. Ed's—they believe they can play with us, and it's on us to set the tone, play with purpose, and impose who we are for all four quarters.

Favorite Sets	Last 2 Minute Sets/ Special Situations
DRIBBLE DRIVE	BLOB - 1-4 LOW
DRIVE AND KICK	BLOB - SCREEN FOR INBOUNDER
MIDDLE BALL SCREEN/ SLOT BALL SCREEN	BLOB - 3 ON OPP SIDE
ZOOM ACTION	DRIBBLE DRIVE
UCLA CUT	DRIVE AND KICK
ISO BALL	ZOOM ACTION

Offensive Tendencies	Defensive Tendencies
67 POINTS PER GAME	PRIMARILY PLAYING MAN TO MAN IN THE HALF COURT
14.4 OFFENSIVE REBOUNDS PER GAME	POST DEFENSE - WILL PLAY LOW SIDE AND BEHIND IN POST
13.4 ASSISTS PER GAME	BALL SCREENS - BLITZ AND HEDGE AND GO OVER TOP
9 STEALS PER GAME	HAND OFFS HAVE SHOWN SWITCH AND POOR COMMUNICATION
42% FIELD GOAL	HAVE SHOWN SOME TOKEN FULL COURT MAN PRESSURE
29% 3PT SHOOTING	HAVE SHOWN SOME TRAPPING ON WINGS TO THE BALL
14.4 FTA PER GAME	HAVE SHOWN MAN VS BLOB/SLOB

Strengths	Weaknesses
OFFENSIVE REBOUNDING	3 POINT SHOOTING
SPEED	FREE THROW SHOOTING
ATHLETIC ABILITY	TRANSITION DEFENSE
	POOR ROTATIONS AND HELP SIDE DEFENSE
	WILL LEAVE BALL SIDE CORNER

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
1/16	East Tech	91- 56 W			
1/14	John F. Kennedy	81-59 W			
1/13	John Adams	64-36 W			
1/9	John Hay	50-45 OT W			
1/7	Lutheran East	71-59 L			

Keys To Victory		
	PLAY WITH COMPOSURE	MOVE WITHOUT THE BALL - BEAT THEM WITH PASS
	TRANSITION DEFENSE	LIMIT PAINT TOUCHES - NO FACE CUTS
	CONTROL THE GLASS	PLAY WITH ENERGY AND SWAG

#3 - #2 - #4 - #10	#5

STARTERS

LEFTY			SENIOR	15.3 PPG	HIGH VOLUME 3PT	
#3 Theo Castro	5'9			59% FT	RUN HIM OFF LINE - PRESSURE INTO TO	

He is the primary point guard and a solid ball handler who plays comfortably with the ball in his hands. 49% of his field goal attempts come from three, where he is shooting 33%, and he is effective both catch-and-shoot and off the dribble, including pull-up threes. He can finish going LEFT or RIGHT and will use a floater, but he does not finish well through contact and can be sped up into turnovers, particularly when attempting to split double teams.

Defensively, he is active and will gamble in passing lanes for steals. The focus must be to keep him in front, be physical, contest all shots, and eliminate paint touches to take away his rhythm.

RIGHTY				10.3 PPG	3PT - SCORER	
#2 Arvell Nelson	6'3			65% FT	CONTEST SHOTS - NO PAINT TOUCHES	

He is a perimeter-oriented scorer, with 52% of his field-goal attempts coming from three-point range, where he is shooting 36% from beyond the arc. Offensively, he is primarily a catch-and-shoot threat from the outside, but he is also comfortable pulling up for jump shots off the dribble. In the half court, he will face up from the right block looking for a jumper and will use a floater to finish when he gets into the lane. He averages 2.1 rebounds per game. Defensively, we must contest his outside shots, stay down on shot fakes, and eliminate paint touches to limit his effectiveness.

LEFTY				7.4 PPG	3PT - DRIVE LEFT	
#5 Jahi Hobson	6'2			88% FT	CONTEST SHOTS - FORCE HIM RIGHT	

He is a perimeter-oriented scorer, with 49% of his field goal attempts coming from three-point range, and he is converting those looks at a 34% clip from beyond the arc. He is primarily a catch-and-shoot threat, featuring a quick release that does not require much space, making him dangerous if left unguarded. We must be disciplined in our closeouts, contest his shots consistently, and make him uncomfortable on the perimeter.

Off the dribble, he is a capable driver who can finish through contact at the rim. While he is able to score going either direction, he prefers to finish going LEFT, where he is most comfortable and effective. Defensively, our focus must be to take away his left hand and force him RIGHT, limiting his efficiency and disrupting his rhythm. Overall, strong ball pressure, controlled closeouts, and physicality are key to neutralizing his offensive impact.

RIGHTY	SOPH	9 PPG	GLASS - PUT BACKS		
#4 Gio Ramos	6'5	52% FT	KEEP OFF GLASS - NO FACE CUTS		

He is the team's best rebounder, averaging 8.5 rebounds per game, and consistently impacts the game with his activity and motor. He profiles as a stretch forward, with 19% of his field-goal attempts coming from three-point range, though he is currently shooting 23% from beyond the arc. While primarily a catch-and-shoot threat from the outside, he will also use a one-dribble sidestep to create space for his jumper.
In transition and half-court play, he runs the floor well, is active on the offensive glass, and looks for offensive put-backs. He cuts hard to the rim, is effective on drive-and-dump actions, and likes to attack the baseline going right from the wing. He will also take a face-up jump shot from the free-throw-line extended, though he tends to fall back on his release and will take sped-up shots when pressured. Around the basket, he will spin back to the middle and use a crow hop to finish.
Defensively, the emphasis must be on making early contact, keeping him off the glass, and eliminating his paint touches. We need to be physical with him throughout possessions, force him to finish through contact, and limit his second-chance opportunities.

LEFTY	SOPH	5.9 PPG	O GLASS - POST PRESENCE		
#10 Lorenzo Smith	6'6	25% FT	KEEP OFF GLASS - WALL UP		

He is a true post presence for them and has not attempted a three-pointer on the season, relying almost exclusively on scoring opportunities at the rim. Offensively, he needs to be in the paint to be effective and prefers to operate from the middle of the key, where he looks for dump-offs, or from the left block. From the left block, he wants to attack baseline, while on the right block he looks to attack middle. When pressured or unsure, he has a tendency to spin back to the middle, often finishing with a soft floater rather than powering through.

He is extremely active on the offensive glass, consistently pursuing second-chance opportunities and generating extra possessions. He is currently averaging 5.3 rebounds per game, with a strong emphasis on offensive rebounds. Defensively, it is critical that we wall up in the paint, stay disciplined on his post touches, and keep him off the offensive glass to limit his effectiveness and eliminate easy scoring chances.

PLAY ST. EDWARD HIGH SCHOOL BASKETBALL

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#1 - #23 - #11 - #30	

BENCH

RIGHTY	SOPH	8.2 PPG	HIGH VOL. 3PT SHOOTER	
#1 Garry Pritchett 5'8		63% FT	CONTEST SHOTS - FORCE LEFT	

He serves as the primary point guard when in the game and is a very quick guard in the open court. Offensively, he looks to drive and finish going to his right, using his speed and solid ball-handling ability to create advantages. From the perimeter, 60% of his field-goal attempts come from three, where he is currently shooting 29%, and he is comfortable both catch-and-shoot and shooting off the dribble, with deep shooting range. Defensively, we must be disciplined on closeouts to his outside shots, force him left, and limit his paint touches to keep him from getting comfortable and controlling the tempo.

RIGHTY	SENIOR	4 PPG	HIGH VOL. 3PT SHOOTER	
#23 Kingston Kenner 5'11		53% FT	RUN OFF LINE - CONTEST SHOTS	

He is a perimeter-oriented shooter, with 88% of his field goal attempts coming from three-point range, and he is currently shooting 33% from beyond the arc. He looks to space the floor and punish defenders who are late or undisciplined on closeouts. We must be prepared to close out under control, run him off the three-point line, and not allow him to get comfortable looks from the outside.

RIGHTY	SOPH	5.8 PPG	HIGH VOL. 3PT SHOOTER	
#11 Davon Moore 6'2		38% FT	CLOSEOUT - RUN OFF THE LINE	

He is a quick guard whose shot profile leans heavily to the perimeter, with 56% of his field goal attempts coming from three-point range, where he is shooting 27% from deep. Offensively, he is primarily a catch-and-shoot threat from the outside and is comfortable pulling up from well beyond the arc, so extended range awareness is important. While he can put the ball on the floor, he is most effective driving to his RIGHT, where he is capable of finishing at the rim. Despite his quickness, he is very loose with the ball and can be pressured into turnovers with physical on-ball defense and active hands. Defensively, we must close out under control and consistently contest his outside shots, while applying pressure to disrupt his rhythm and decision-making.

RIGHTY		6.5 PPG	POST - GLASS	
#30 Eason Hankins 6'5		0% FT	WALL UP - KEEP OFF GLASS	

He is a big body, slow-footed post who does his damage around the rim. Offensively, he is not a perimeter threat and has not attempted a three-pointer on the season, looking to score primarily off dump-offs, offensive put-backs, and plays right at the basket. He relies on size and positioning rather than skill or quickness. We need to make him run the floor, play with pace, and wear him down in transition. Defensively, it is critical that we wall up in the paint, be physical, and keep him off the offensive glass to eliminate second-chance points.
