Saint Edward High School vs. Louisville	1/23/2026	Prepared by: Coach Donelon

Louisville enters our contest with an overall record of 8–7 and is coming off a significant transition year, having lost all of the key contributors from their 2024–2025 state championship team. As a result, they are still searching for consistency and identity on both ends of the floor. Offensively, Louisville has shown that they struggle to handle pressure and can be forced into turnovers when consistently challenged. In the half court, they will look to generate offense through drive-and-kick actions, UCLA cuts, flare action, middle or slot ball screens, and occasional elevator action that flows into back-door opportunities. Disrupting timing and taking away easy passing angles will be key. Defensively, Louisville is primarily a man-to-man team, but they have difficulty getting below the line of the ball in transition, which can be exploited with pace and ball movement. They have also mixed in some zone looks, including 2-2-1 and 1-2-2 pressure, with trapping extending over half court at times. To be successful, we need to play connected for all four quarters, value each possession, and avoid careless turnovers, especially against their pressure. Staying disciplined, poised, and aggressive will put us in a strong position to control the game.

Favorite Sets	Last 2 Minute Sets/ Special Situations
DRIVE AND KICK	BLOB - BOX TO ELEVATOR
UCLA CUT	BLOB - SCREEN FOR INBOUNDER
MIDDLE BALL SCREEN/ SLOT BALL SCREEN	BLOB - BOX TO DOUBLE SCREEN
FLARE ACTION	DRIVE AND KICK
ELEVATOR TO BACK DOOR	FLARE ACTION
	UCLA CUT

Offensive Tendencies	Defensive Tendencies
THROUGH 7 GAME FILMS	PRIMARILY MAN TO MAN IN THE HALF COURT
35.2% FROM 3PT	SLOT BALL SCREEN - HEDGE AND OVER TOP
11 FREE THROW ATTEMPTS PER GAME	WEAKSIDE PIN DOWN - LOCK AND TRAIL
7.5 OFFENSIVE REBOUNDS PER GAME	2-1-2 FULL COURT PRESSURE
16.8 TURNOVERS PER GAME	SOME 1-2-2 FULL COURT PRESSURE - TRAPPING OVER HALF COURT
	3-2 HALF COURT ZONE - BACK TO 2-3 ZONE
	BLITZ BALL SCREENS
	POST DEFENSE - HIGH SIDE/BEHIND

Strengths	Weaknesses
ABILITY TO GET HOT FROM OUTSIDE	TRANSITION DEFENSE
MOVING WITHOUT THE BALL	GUARD PLAY IS NOT AS STRONG AS PAST 2 YEARS
PHYSICAL	TURNOVERS - 16.8 PER GAME
PLAY TOUGH FOR 4 QUARTERS	POOR WEAKSIDE ROTATIONS
	POOR COMMUNICATION ON BALL SCREENS

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
1/20	Marlington	65-29 W			
1/18	Gahanna Lincoln	59-41 L			
1/16	Canfield	59-39 L			
1/10	Barberton	47-41 W			
1/6	Hoover	56-51 L			

Keys To Victory		
	PRESSURE INTO TURNOVERS	NO FACE CUTS
	CONTROL THE GLASS	LIMIT TURNOVERS
	CONTEST OUTSIDE SHOTS	PLAY WITH SWAGGER

#12 - #4	#20 - #22 - #3

STARTERS

RIGHTY			SOPH	7.7 PPG	**DRIVE 1st**	
#12 Drake Wilson	**5'11**	**160 LB**		53.3% FT	LIMIT PAINT TOUCHES - BE PHYSICAL	

Over the 7 games of film, he has shown himself to be a guard with solid ball-handling skills who is comfortable creating with the ball in his hands. Thirty-five percent of his field-goal attempts during this stretch have come from three-point range, though he has struggled with efficiency, shooting 13.3% from beyond the arc. The majority of his perimeter looks are catch-and-shoot opportunities, but he will also take—and is confident pulling up for—jump shots off the dribble at times. When attacking off the bounce, he looks to drop his shoulder and draw contact on drives to the rim, where he is capable of finishing going either left or right and will frequently use a floater to score in traffic. Off the ball, he does a good job cutting hard to the rim and will look to leak out in transition when opportunities present themselves. He is active on the glass for his position, averaging 3.5 rebounds per game. Defensively, we need to be disciplined and prepared to not let him get into a rhythm from the outside, while also limiting his paint touches. Applying pressure and crowding his space can disrupt his comfort level and help force him into turnovers.

RIGHTY			JUNIOR	9.4 PPG	**HIGH VOLUME 3PT**	
#20 Cohen Rogers	**6'1**	**160 LB**		88.9% FT	CONTEST SHOTS - NO PAINT TOUCHES	

Over the 7 games of film, he has established himself as a high-volume three-point shooter, with 60% of his field goal attempts coming from beyond the arc while converting at an efficient 42.4% from three. He does a good job moving without the ball to create catch-and-shoot opportunities and is comfortable spacing the floor. Off the dribble, he will pull up for a mid-range jump shot when defenders overplay the perimeter. When attacking the rim, he is primarily looking to finish going RIGHT, but he does not finish well through contact. Defensively, we must be prepared to run him off the three-point line and consistently contest his outside shots to prevent him from getting into a rhythm.

RIGHTY			SENIOR	3.7 PPG	**HIGH VOLUME 3PT**	
#22 Luke Boldon	**6'2**	**165 LB**		75% FT	CONTEST SHOTS - RUN HIM OFF THE LINE	

Over the 7 games of film reviewed, 78% of his field goal attempts have come from the three-point line, highlighting that he is heavily perimeter-oriented offensively. He is not a quick guard and relies more on positioning and shot preparation than speed. From the outside, he is primarily a catch-and-shoot threat, and he is converting at a strong 38% from three-point range.

When he puts the ball on the floor, he is primarily looking to drive right, and rather than attacking all the way to the rim, he will often use a floater to finish. He can be pressured into turnovers, especially when forced to dribble under defensive heat. Defensively, we need to run him off the three-point line, make him put the ball on the floor, and be prepared to close out aggressively on his outside shots to prevent him from getting comfortable from deep.

RIGHTY			SOPH	0.3 PPG	**GLASS - PUT BACKS**	
#4 Jake Baker	**6'3**	**225 LB**		50% FT	KEEP OFF GLASS - NO FACE CUTS	

He has seen limited playing time, and when on the floor his impact is almost entirely around the basket. He has to be around the rim to score and is not a perimeter threat, as he has not attempted a three-point shot over the seven games. Offensively, he is primarily looking to set solid screens, rebound, and create second-chance opportunities. He is active on the glass and looks to score off offensive put-backs rather than creating his own shot. From the right block, he is looking to attack baseline when given space. Defensively, we need to be physical, wall up in the paint, and be prepared to keep him off the glass to eliminate easy points and extra possessions.

RIGHTY			SOPH	4.7 PPG	**POST - CUTS TO RIM**	
#13 Brandon Sanders	**6'4**	**180 LB**		60% FT	WALL UP - BE PHYSICAL	

Over the 7 games of film, he has attempted only one three-point shot, and on the season he is 0-for-1 from three, indicating he is not a perimeter shooting threat. During this stretch, he is averaging 3.7 rebounds per game and does most of his damage inside the paint.

Offensively, he is a rim-oriented scorer who looks to score off strong drives, cuts to the basket, and post-ups. When putting the ball on the floor, he prefers to finish going to his right, and you must anticipate the spin back to his right. From the right block, he consistently looks to attack baseline. On the left block, he has shown the ability to attack middle or face up and drive baseline.

Defensively, our focus must be to limit his paint touches, force him left on drives, and wall up at the rim to take away his preferred finishes and make him uncomfortable around the basket.

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#30 - #25	

BENCH

RIGHTY	**JUNIOR**	**4.3 PPG**	**HIGH VOL. 3PT SHOOTER**	
#30 Max Mathie	**6'2** **165 LB**	**NO ATT**	**CLOSEOUT - RUN OFF THE LINE**	

He does a good job of moving without the ball and is effective at finding space within the offense. He will look to take a mid-range jump shot off the dribble and does a good job of cutting backdoor to the rim when defenders overplay him. From the right block, he will look to face up or attack baseline. Over the course of the film, 60% of his field goal attempts have come from three-point range, where he is shooting 33.3%. From the perimeter, he is primarily a catch-and-shoot threat but is capable of shooting off the dribble when he needs to create time and space. Defensively, we need to be prepared to contest his shots from the outside, run him off the three-point line, and make him put the ball on the floor under pressure.

RIGHTY		**3.5 PPG**	**MID-RANGE - 3PT**	
#25 Colton Dougherty	**6'2** **210 LB**	**30% FT**	**ELIMINATE FACE CUTS - CONTEST SHOTS**	

Over the 7 games of film, 22% of his field goal attempts have come from three-point range, where he is shooting 40%. From the perimeter, he is primarily a catch-and-shoot 3PT shooter and needs time and space to get his shot off, so closeouts must be urgent and disruptive. In the post, from the left block he will attack middle, while from the right block he prefers to attack baseline. He is capable of knocking down a mid-range jump shot from the free-throw line extended. Off the dribble, he can drive left or right to finish at the rim but favors going right, though he does not finish well with contact and is not extremely strong with the ball. He is averaging 3 rebounds per game. Defensively, the emphasis should be to be physical, take away face cuts, wall up at the rim, and make him uncomfortable from the outside.
