Saint Edward High School vs. St. Vincent-St. Mary 1/30/2026 Prepared by: Coach Donelon

St. Vincent–St. Mary enters our contest with an overall record of 9–7, having gone 3–2 over their last five games. On the defensive end, expect them to primarily play basic man-to-man (our 10), while mixing in a soft 1-2-1-1 full-court look designed to slow tempo and look to trap on the sideline. They will hedge ball screens and apply significant pressure to our 14, utilizing full deny coverage with quick traps. In transition, they are slow to get back, and their guards will gamble aggressively on the ball, relying on their bigs to protect the rim on the back end. Offensively, expect a steady diet of drive-and-kick basketball, with actions centered around Horns sets, Iverson cuts, middle and slot ball screens, single/double actions, and hit-and-go opposite / rub action to create driving lanes and perimeter looks. For us to be successful, we must control the glass, play with poise and swagger, and take care of the basketball by valuing every possession. Transition defense will be paramount, as they are looking to get out and score before the defense is set.

Favorite Sets	Last 2 Minute Sets/ Special Situations
DRIVE AND KICK	BLOB - BOX
HORNS ACTION	BLOB - BOX - S+S
IVERSON CUT	BLOB - 3 HIGH
MIDDLE AND SLOT BALL SCREENS	MIDDLE BALL SCREEN AND SLOT BALL SCREEN
SINGLE DOUBLE	DRIVE AND KICK
HIT AND GO OPPOSITE / RUB ACTION	

Offensive Tendencies	Defensive Tendencies
RELY HEAVILY ON ISO BALL	Basic man (our 10)
REALLY LOOKING TO GET OUT AND PUSH IN TRANSITION	Soft 1-2-1-1 full court (looking to trap on sideline)
DRIVE AND KICK OFFENSIVE REBOUNDING -	Hedge ball screens
NOT GREAT SHOOTING FROM 3PT - 27.1%+	Our 14 with full deny and quick trap.
FTA PER GAME - 23.6 PER GAME	Slow to get back in transition
	Guards will gamble on ball, relying on bigs to protect rim

Strengths	Weaknesses
VERY LONG AND ATHLETIC	3 POINT SHOOTING
TRANSITION OFFENSE	FREE THROW SHOOTING
ABILITY TO DRIVE THE BALL - ISO DRIVERS	CARELESS TURNOVERS
REBOUNDING	

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
1/23	Hoban	58-51 W			
1/20	Lutheran East	78- 55 L			
1/18	Moeller	46-42 W			
1/13	CVCA	62-52 W			
1/10	Chaney	53-49 L			

Keys To Victory		
	TRANSITION DEFENSE	WEAK SIDE ROTATIONS
	ELIMINATE PAINT TOUCHES	NO 2ND - 3RD SHOT OPPORTUNITIES
	NO STRAIGHT LINE DRIVES/MIDDLE	PLAY WITH HIGH ENERGY AND SWAG

Thoughts for the game

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#13 - #0 - #15	#21 - #34

STARTERS

RIGHTY			SENIOR	21 PPG	SCORING GUARD	
#13 DeCarlo Prince	6'4			67% FT	LOCATE EARLY - LIMIT PAINT TOUCHES	

He is a scorer by mentality with an explosive first step to the rim, consistently looking to attack downhill. He has the ability to finish with either hand at the rim and prefers to drive right, using his length and speed to create advantages off the bounce. He is effective in the mid-range with pull-up jumpers off the dribble, especially when defenders retreat to cut off the drive. While he is not a strong outside shooter, film review across seven games shows him shooting 28% from three, primarily on catch-and-shoot opportunities. Defensively, he uses his length and athleticism to jump passing lanes for steals and is active on the glass, averaging 5.8 rebounds per game. He recently reached a major milestone by scoring his 1,000th career point for the Irish, reflecting his aggressive, confident approach to scoring. Key emphasis: we must locate him early in transition, limit paint touches, and keep him in front to reduce his impact.

RIGHTY			FROSH	2.3 PPG	HIGH VOLUME 3PT	
#21 Amari Cobbin	6'3			100% FT	RUN HIM OFF LINE - CONTEST OUTSIDE SHOTS	

He is a high-volume three-point shooter, with 50% of his field-goal attempts over a 7-game film sample coming from beyond the arc, though he is currently shooting 25% from three. He is a lanky wing who tends to avoid contact, looking to drive right or use a floater to finish at the rim when attacking off the bounce. From the perimeter, he is primarily catch-and-shoot. Defensively, we need to be physical, run him off the line, and consistently contest his outside shots to disrupt his rhythm.

RIGHTY			SENIOR	6.8 PPG	DRIVE 1ST WING	
#0 Caleb Hill	6'4			58.3% FT	LIMIT PAINT TOUCHES - KEEP IN FRONT	

Through a 7-game film sample, he is shooting 9.1% from three-point range. He is a drive-first guard who looks to attack off the bounce and has the ability to finish through contact at the rim, using a crow hop, euro step, or floater to score in traffic. In the half court, he is effective with a mid-range pull-up off the dribble and will frequently use a shot fake to create separation. From the perimeter, he is primarily a catch-and-shoot player, but will also put the ball on the floor to create space when closing defenders overplay. Defensively, we must locate him early in transition and limit paint touches by keeping him in front and shrinking the floor.

RIGHTY	SOPH	3.6 PPG	ROLE PLAYER	
#15 Aidan Reynolds	6'5		50% FT	BE PHYSICAL - NO FACE CUTS	

From the left block, he will face up or attack the middle, while on the right block he looks to attack the baseline. He is comfortable putting the ball on the floor from the wing and driving, with a preference to finish going right, and he moves well without the ball, consistently cutting to the rim. Through the 7-game film sample, he is 1-for-2 from three-point range and is primarily a catch-and-shoot option from the perimeter while averaging 2.2 rebounds per game. Defensively, we must eliminate face cuts, be physical with him, and keep him off the glass to limit his effectiveness.

RIGHTY	SENIOR	12.8 PPG	POST	
#34 Leigh Cotton	6'6		77.1% FT	WALL UP - KEEP OFF GLASS	

Through 7 games of film, he is 1-of-3 from three-point range, primarily looking to shoot on ball reversals if left open, and is mostly a catch-and-shoot threat from the perimeter. His biggest impact comes inside, where he is extremely active on the glass, averaging 8.2 rebounds per game, and consistently scoring on drive-and-dump actions, rim rolls, and offensive put-backs. From the left block, he looks to face up or attack the middle, while on the right block he prefers to attack baseline, with the ability to spin back baseline or face up for a short-corner jumper. Defensively, we must wall up, be physical, keep him off the glass, and eliminate second- and third-shot opportunities.

Thoughts for the game

PLAY ST. EDWARD HIGH SCHOOL BASKETBALL

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#1 - #2 - #4	

STARTERS

RIGHTY			JUNIOR	3.7 PPG	DRIVE 1ST GUARD	
#1 Justin Robinson	5'9			NO ATT	LIMIT PAINT TOUCHES - KEEP HIM IN FRONT	

When he is in the game, he serves as the primary point guard and fills a role-player spot within their rotation. He is a drive-first guard with decent handles, but can be pressured into turnovers when defended aggressively. Around the rim, he will look to finish using a floater or Euro step, though he does not finish well through contact. From the perimeter, he is primarily a catch-and-shoot option when left open, rather than a consistent shot creator. Defensive emphasis: keep him out of the paint, apply physical on-ball pressure, and make him uncomfortable to disrupt his decision-making.

RIGHTY			SOPH	3 PPG	DRIVE 1ST GUARD	
#2 Ascen Lomack	5'10			NO ATT	LIMIT PAINT TOUCHES - KEEP HIM IN FRONT	

He can be loose with the ball and will over-dribble at times, which creates opportunities to pressure him into turnovers. We cannot allow him to get hot from the outside, as he is capable of shooting off the dribble beyond the arc. Offensively, he will score on drives to the rim—using DHO actions to attack—and has the ability to finish left or right, including through contact. Defensively, our focus must be to limit his paint touches, apply consistent ball pressure, and disrupt his rhythm early.

LEFTY			SOPH	3.2 PPG	DRIVE 1ST GUARD	
#4 Geovonni Vinson	5'10			50% FT	NO PAINT TOUCHES - KEEP HIM IN FRONT	

He consistently plays sped up and looks to create offense quickly, often taking mid-range jump shots off the dribble where he tends to fall backward on his release. He prefers to finish going to his right and will utilize a floater to score around the rim. He shows decent handles and is capable of contributing as a catch-and-shoot option from the perimeter, while also looking to leak out in transition for easy scoring opportunities. Through the 7 game film sample, he is 2-of-6 from three-point range. Defensively, we must keep him in front, limit paint touches, and not allow him to get into a rhythm from the outside.
