Saint Edward High School vs. Lutheran East | **2/10/2026** | **Prepared by: Coach Donelon**

LUTHERAN EAST ENTERS OUR CONTEST WITH AN OVERALL RECORD OF 16–1 AND IS RANKED AS THE #1 TEAM IN NORTHEAST OHIO. THEY PLAY WITH A SHORT BENCH BUT ARE A VERY TALENTED GROUP WITH EXCEPTIONAL GUARD PLAY. OFFENSIVELY, THEY WANT TO PLAY FAST AND SCORE IN TRANSITION WHILE FEATURING IVERSON, MIDDLE BALL SCREEN, DOUBLE DRAG, ZOOM, PISTOL, RUB ACTION, AND FLARE CUTS TO CREATE ADVANTAGES FOR THEIR GUARDS. DEFENSIVELY, LUTHERAN EAST PRIMARILY PLAYS MAN-TO-MAN IN THE HALF COURT BUT WILL MIX IN 1-2-2 / 2-1-2 FULL-COURT PRESSURE, 1-3-1, AND OCCASIONAL 3-2 ZONE. THEY STRUGGLE WITH WEAK-SIDE ROTATIONS AND HAVE POOR TRANSITION DEFENSE, OFTEN NOT LOADING TO THE BALL OR GETTING BELOW IT. THEY PLAY BEHIND IN THE POST, WILL BLITZ OR TRAP TO THE BALL AT TIMES, AND HARD HEDGE ON BALL SCREENS AND DHOs.
THIS IS OUR OPPORTUNITY TO SHOW WHY WE ARE THE #1 TEAM IN THE AREA — PLAY WITH POISE, PRIDE, AND SWAGGER.

Favorite Sets	Last 2 Minute Sets/ Special Situations
ZOOM	BLOB - S+S
PISTOL	BLOB - BOX TO ELEVATOR
MIDDLE BALL SCREEN	BLOB - BOX TO PIN DOWN
IVERSON	MIDDLE BALL SCREEN
FLARE ACTION	ZOOM
SLOT BALL SCREEN	PISTOL

Offensive Tendencies	Defensive Tendencies
20.6 3PT FGA PER GAME	Primarily will look to play man to man in the half court
SHOOTING 32% FROM 3PT	Have shown some 1-2-2 / 2-1-2 full court pressure
11.6 OFFENSIVE REBOUNDS PER GAME	Have shown 1-3-1 in the half court - Have shown some 3-2 zone as well
13 FTA PER GAME	Struggles with weak side rotations
63.8% FT SHOOTING	Lock and trail on weak side rotations
	POOR TRANSITION DEFENSE - Do not load to ball or get below line of the ball
	Primarily look to play behind in the post - WILL PUSH OFF BLOCK
	Have blitzed at times on wings - TRAP TO THE BALL
	Guard to Guard - push on ball screens and DHO - Will hard hedge and over

Strengths	Weaknesses
Transition Offense	Free Throw Shooting
Offensive Rebounding	Weak side Rotations
Guard play	Transition Defense
Ability to score in bunches	Bench
Execute offensive sets	Prone to gamble for steals/home run play

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
2/8	Shaker Heights	63 - 40 W			
2/6	Lutheran West	58 - 47 W			
2/4	Norton	78 - 54 W			
2/1	Maysville	82 - 76 L			
1/24	Garfield Heights	64 - 55 W			

Keys To Victory		
	TRANSITION DEFENSE	WEAK SIDE ROTATIONS
	CONTROL THE GLASS	CONTEST OUTSIDES SHOOTERS
	NO STRAIGHT LINE DRIVES/MIDDLE	PLAY WITH HIGH ENERGY AND SWAG

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#11 - #1 - #4	#0 - #5

STARTERS

RIGHTY			JUNIOR	10.1 PPG	SCORING PG	
#11 Tyrone Harrison	6'0			57.1% FT	KEEP HIM IN FRONT - ELIMINATE PAINT - CONTEST	

He is an extremely quick, explosive primary point guard who can put pressure on the defense with his first step. Over the film, 53% of his field-goal attempts have come from three-point range, though he is currently shooting 25% from beyond the arc. When attacking the basket, he will use a floater to finish at the rim, especially when help steps up. He is an active on-ball defender who plays passing lanes well and will generate steals.
Defensively, the emphasis must be to keep him in front and eliminate paint touches. While the percentage is low, he is capable as a catch-and-shoot threat from the outside, so we cannot give him space or time on the perimeter. Closeouts must be disciplined and under control, while still cutting off driving lanes and forcing him to finish over length rather than allowing downhill attacks.

RIGHTY			SOPH	15.3 PPG	SCORER MENTALITY	
#0 Dylan Zeigler	6'3			80.6% FT	LOCATE EARLY - KEEP IN FRONT - NO PAINT TOUCHES	

Over the film, 50% of his field-goal attempts have come from the three-point line, where he is currently shooting 29.4% from three. He is a threat both as a catch-and-shoot player and shooting off the dribble, with deep range, and he will confidently take the three when given time and space. While he is capable of driving left or right to finish at the rim, when in doubt he consistently reverts to finishing going to his right. He has shown the ability to finish through contact at the rim, making him difficult to contain once he gets downhill. Off the bounce, he plays with a scorer's mentality, using an explosive first step to create advantages. He effectively incorporates a crow hop and euro step to finish, and is comfortable pulling up for a jump shot off the dribble. He does a very good job utilizing hesitation moves, rip-and-go actions, and changes of direction and speed to keep defenders off balance and create space. Defensively, our focus must be to locate him early, keep him in front of us, and eliminate paint touches. We must contest his outside shots, apply consistent ball pressure, and make him uncomfortable throughout the possession.

LEFTY			JUNIOR	10.4 PPG	DRIVE 1ST GUARD	
#1 Chris Hill	6'0			66.7% FT	ELIMINATE PAINT TOUCHES - KEEP IN FRONT	

Over the film sample, 33% of his field goal attempts have come from the three-point line, where he is shooting 33% from beyond the arc. He is a solid ball handler and operates primarily as a drive-first guard, looking to put pressure on the rim rather than settle from the perimeter. He finishes well through contact and has the ability to finish going either left or right, making him difficult to contain once he gets downhill.

He does an excellent job changing speed and direction, consistently using crow hops and euro steps to create angles and finish at the rim. While he prefers to drive left, he is comfortable and effective finishing either way. In addition to his rim attacks, he will pull up from the free-throw line extended for a mid-range jump shot when defenders retreat. Defensively, we must locate him early in transition, keep him in front of us, and eliminate paint touches to limit his effectiveness.

RIGHTY	SENIOR	4 PPG	O GLASS - DRIVE AND DUMP	
#4 Davion Snowden	6'5		NO ATT	KEEP OFF GLASS - WALL UP	

He is a physical big who does his best work around the rim. Offensively, he is most effective on the right block, where he looks to attack baseline, and he consistently scores off drive-and-dump actions. He is extremely active on the offensive glass, generating second-chance points through offensive put-backs and high-effort rebounding. To be effective, he needs to be at the rim to score and thrives when plays are created for him in the paint.

While he is not a primary perimeter threat, he will shoot the three if left wide open. Across 10 games of film, he is 2-of-4 from three, with 26% of his field-goal attempts coming from beyond the arc. Defensively, our emphasis must be to keep him off the glass, be physical early, and wall up at the rim to take away his strength, second-chance opportunities, and paint finishes.

RIGHTY	SENIOR	9 PPG	POST - GLASS	
#5 Jerome Davis-Gayle	6'5		75% FT	WALL UP - KEEP OFF GLASS	

Over the 10 games of film we have, 30% of his field-goal attempts have come from three-point range, where he is shooting 25%, and he is averaging 4 rebounds per game. He is an extremely physical big who will bully defenders on the block. From the right block, he looks to attack baseline, while on the left block he prefers to attack middle—watch for the spin back to the middle. He rolls hard on ball screens and will shoot from the outside on pin-downs and kick-outs when left open. He is strictly a catch-and-shoot threat from the perimeter. Defensively, we must keep him off the glass, be physical, wall up, and not let him get comfortable from the outside.

Thoughts for the game

PLAY ST. EDWARD HIGH SCHOOL BASKETBALL

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#3 - #15	

STARTERS

RIGHTY			FROSH	9.7 PPG	**STRETCH FORWARD**	
#3 Bryce Irby	**6'6**			66.7% FT	NO PAINT TOUCHES - CONTEST SHOTS	

He is a long post player who operates as a true stretch forward, with 40% of his field goal attempts coming from three-point range. He is an effective catch-and-shoot threat from the perimeter and is currently shooting 50% from three, making him a consistent outside scoring option. Offensively, he primarily wants to drive right, using an explosive first step to attack the rim, and he is capable of finishing through contact once he gets into the paint. When he is forced left, he will often look to stop and pull up for a jump shot rather than finishing at the rim. He is averaging 3 rebounds per game, providing some production on the glass but not serving as a primary rebounder. Defensively, our focus must be to eliminate paint touches, keep him in front, and consistently contest his outside shots to prevent him from getting into a rhythm.

RIGHTY	JUNIOR	7.3 PPG	**OFF GLASS - DUMP OFFS**	
#15 Devontey Perkins **6'7**		37.5% FT	KEEP OFF GLASS - WALL UP	

Over the 10 games of film that we have, he has not attempted a single three-point shot, confirming that he is a true interior presence. He is a physical big with a high motor who provides strong energy and toughness off the bench.

Offensively, on the right block, he will face up and attack the baseline, and he has also shown the ability to put the ball on the floor and attack the middle. From the left block, he most often looks to attack the middle, but he is comfortable spinning back baseline to finish. He is extremely active on the glass, averaging 7.2 rebounds per game, and creates second-chance opportunities through sheer effort and physicality.

The majority of his scoring comes from post entries, drive-and-dump opportunities, and offensive put-backs. We must be prepared to wall up at the rim, be physical early, and keep him off the offensive glass, as limiting his second chances will be critical to neutralizing his impact.
