Saint Edward High School vs. Elyria	3/14/2026	Prepared by: Coach Donelon

Elyria enters the Elite Eight with an overall record of 19–6 and runs a structured half-court offense built around spacing and movement. Offensively, they will shuffle into 5-out, use zipper action for post entry, and create attacks through dribble handoffs (DHO) that lead to downhill drives. Their sets include backdoor cuts, 1–4 high to flare, Iverson cuts, and "Our 3" action, while also using ISO opportunities for #2 or #24 to create scoring chances. Defensively, Elyria primarily plays man-to-man but will mix in 2–3 and 3–2 zone looks. They have shown 1-4 pressure after made free throws, token full-court man pressure, and 2-2-1 pressure after made baskets that drops back into man or a 3-2 zone. They may trap before half court and away from the ball over half court and tend to force middle penetration. Their weak-side rotations can be poor, they defend the post low side and from behind, can get caught on screens, fight over ball screens, and will black DHO actions. We must show Elyria why we are the best damn team in Northeast Ohio. Play with pride, passion, and swagger and punch our ticket to the Final Four.

Favorite Sets

SHUFFLE TO 5 OUT
ZIPPER TO POST ENTRY
DHO TO DOWNHILL ATTACK
BACK DOOR 1-4 HIGH TO FLARE
IVERSON CUT
OUR 3 ACTION ISO ACTION - 2 OR 24

Last 2 Minute Sets/ Special Situations

BLOB- MICHIGAN - DOUBLE ELEVATOR
BLOB - BOX - J ACTION
BLOB - GATES - WEAKSIDE ISO
SLOB - FLARE
SLOB - PIN DOWN

Offensive Tendencies

9.5 OFFENSIVE REBOUNDS PER GAME
16 ASSISTS PER GAME
11.5 STEALS PER GAME
11.8 TURNOVERS PER GAME
24.8 3PT ATTEMPTS PER GAME
10.1 FTA PER GAME

Defensive Tendencies

Man to man - 2-3 zone - 3-2 zone
Have shown some 14 after a made free throw
Have shown some token make full court man pressure
Have shown some 2-2-1 after a made basket (will drop back to 10 or 3-2)
Will look to trap to the ball before half court - away from ball over half court
Seem to force middle penetration
Poor weak side rotations - Stay glued to man
Post Defense: Low Side - Behind
Get caught up on screens
Ball screens - Fight over top - DHO - Will look to BLACK

Strengths

3 point Shooting
Transition Offense
Ability to crash offensive glass
2 and 24 can score in bunches

Weaknesses

At times will play lethargic
Weak side rotations
Do not run extremely hard in transition
Zone Offense

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
3/11	Brunswick	54 - 39 W	#2 - 18 points	#0/24 - 8 rebs	#5 - 5 assists
3/7	Canton McKinley	50 - 46 W	#24 - 21 points	#0 - 7 rebs	#5 - 3 assists
3/3	Medina	76 - 44 W	#24 - 26 points	#24 - 10 rebs	#5 - 6 assists
2/20	Avon	74 - 68 W	#24 - 17 points	#24 - 8 rebs	#5 - 4 assists
2/13	Berea - Midpark	75 - 64 L	#24 - 19 points	#2 - 8 rebs	#2 - 4 assists

Keys To Victory

CONTROL THE GLASS
GUARD THE BALL
DO THE LITTLE THINGS - 50/50 - CHARGES
MOVE WITHOUT THE BALL
TRANSITION DEFENSE
ELIMINATE PAINT TOUCHES

#2 - #0	#5 - #1 - #24

STARTERS

RIGHTY		JUNIOR	6.6 PPG	PRIMARY PG	
#5 Tink Shelton	5'5		92% FT	LOCATE EARLY - KEEP HIM IN FRONT - ELIMINATE PAINT TOUCHES	

He is a very small but quick guard who serves as the team's primary point guard and does an excellent job facilitating the offense. A very good distributor, he is averaging 3.7 assists per game, while also contributing 1.8 steals per game because of his ability to pressure the ball defensively. He is an active and aggressive on-ball defender who looks to disrupt passing lanes and create steals. Offensively, 39.2% of his field goal attempts have come from three-point range, where he is shooting 27% from three. He is capable in catch-and-shoot situations from the perimeter, but he will also use the dribble to create space for outside shots. He averages 1.8 rebounds per game. His primary objective offensively is to get into the paint and create drive-and-kick or dump-off opportunities for teammates. When attacking the rim, he has the ability to finish going left or right, but he consistently wants to get back to his right hand on drives. He does not typically finish through contact, often relying on a floater to complete plays at the rim. Defensively, we must locate him early, keep him in front of us, and eliminate paint touches, as much of his effectiveness comes from breaking down the defense and creating opportunities for others.

RIGHTY		SENIOR	13.0 PPG	SCORER MENTALITY	
#2 Jermiah Daniels	6'2		52% FT	KEEP HIM IN FRONT - FORCE LEFT - CONTEST SHOTS	

Jermiah is a drive-first guard who is very quick in the open court and has a very explosive first step to the rim. He plays with pace off the bounce, will often attack off two feet, and is primarily looking to get downhill and finish going right at the rim. He likes to use a crossover to get back to his right hand and create driving angles into the paint. While his first instinct is to drive, he is also capable of catching and shooting from the perimeter when left open. Forty-eight percent of his field goal attempts have come from three-point range, and he is currently shooting 38% from three. He is also averaging 3.1 rebounds per game. Defensively, he is a very active on-ball defender. We must eliminate paint touches, keep him in front, and contest his outside shots.

RIGHTY		SENIOR	10.8 PPG	HIGH VOLUME 3PT	
#1 Rondell Grimmett	6'2		74% FT	CONTEST HIS SHOTS - FORCE HIM LEFT - MAKE HIM DRIVER	

Rondell is a scrappy wing who primarily looks to impact the game as a perimeter shooter. On the season, 58% of his field goal attempts have come from three-point range, where he is shooting 37% from three, making him a legitimate catch-and-shoot threat from the outside. He averages 2.3 rebounds per game and will compete for loose balls and hustle plays despite not being a high-volume rebounder. Rondell's game is influenced by a previous bout with bone cancer, which resulted in his left arm being shorter than his right arm. As a result, he is very limited going to his left. When he puts the ball on the floor, he is primarily looking to attack and finish going to his right. Offensively, he is most comfortable spacing the floor and looking for catch-and-shoot opportunities from beyond the arc. Defensively, we must locate him early and prepare to close out hard on his outside shots. Our goal should be to force him to put the ball on the floor and make him become a driver, specifically forcing him to go left, where he is much less effective.

RIGHTY		SENIOR	7.1 PPG	GLASS - STRETCH FORWARD	
#0 Cam Bell	6'3		63% FT	WALL UP - KEEP OFF GLASS - NO FACE CUTS	

Cam has taken 36% of his field goal attempts from three-point range and is shooting 35% from the outside, while averaging 4.3 rebounds per game. He is a very weak ball handler, and when pressured he can get loose with the ball and be forced into mistakes. Offensively, we want to make him become a driver and take away clean perimeter looks. When Cam does attack, he generally looks to avoid contact and will occasionally attempt fade-away shots off one leg. Out of the post, from the left block he will look to attack middle, while from the right block he looks to attack baseline. He is also extremely active on the glass, so we must do a great job keeping him off the boards. Defensively, we need to close out under control, wall up at the rim, and eliminate face cuts.

RIGHTY		SENIOR	23.1 PPG	SCORER MENTALITY - ISO - GLASS	
#24 Kendyll Compton	6'5		76% FT	KEEP HIM IN FRONT - KEEP OFF GLASS - CONTEST SHOTS	

Kendyll is a very athletic big who runs the floor extremely well and serves as a strong rim-runner in transition. Although he has the size to operate around the basket, 43.7% of his field goal attempts have come from three-point range, where he is shooting an efficient 45%. Most of these are catch-and-shoot opportunities, so it is important to locate him early and contest his outside shots. He likes to isolate and is a drive-first player with an explosive first step who prefers to finish going to his right. When attacking the rim, he can finish through contact and will also use a floater, while at times being willing to take contested shots.

In the post, Kendyll will look to attack baseline from the right block, while from the left block he can operate in the mid-post area with a mid-range jumper, turnaround from the porch, and a short corner jump shot. He is also active on the glass, averaging 5.2 rebounds per game. Defensively, we must keep him in front, eliminate paint touches, contest his outside shots, and keep him off the glass.

Thoughts for the game

PLAY ST. EDWARD HIGH SCHOOL BASKETBALL

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#4 - #20 - #10 - #3	

BENCH

RIGHTY — 1.9 PPG — **DRIVE FIRST GUARD**

#4 Christian Rogers **5'11** — 43% FT — KEEP HIM IN FRONT - ELIMINATE PAINT TOUCHES - NO FACE CUTS

Christian is a drive-first guard with an explosive first step to the rim. Although 31% of his field goal attempts have come from three-point range, he is shooting just 23% from the perimeter and primarily operates as a catch-and-shoot option from the outside. When he puts the ball on the floor, he is looking to attack downhill and prefers to finish going to his right at the rim. Defensively, Christian is an active on-ball defender who applies pressure to opposing ball handlers, and he will also crash the offensive glass when opportunities arise, averaging 1.5 rebounds per game. Against him, we need to eliminate paint touches, keep him in front, and take away face cuts.

RIGHTY **SOPH** — 3.8 PPG — **DRIVE FIRST GUARD**

#20 Ethan Rogers **6'1** **155 LBS** — 40% FT — KEEP HIM IN FRONT - ELIMINATE PAINT TOUCHES - NO FACE CUTS

Ethan is an athletic guard who plays with good pace and does a very good job moving without the ball, consistently looking for opportunities to cut to the rim. Only 12% of his field goal attempts have come from three-point range, but he has been very efficient when shooting from the perimeter, connecting on 44% of his three-point attempts. He is also averaging 2.5 rebounds per game. Ethan possesses an explosive first step to the rim and is primarily looking to finish going to his right when attacking the basket. In addition to his ability to score at the rim, he can create offense with a mid-range jump shot off the dribble and is capable of knocking down catch-and-shoot opportunities from the outside. He will also look to leak out in transition when the opportunity presents itself. Defensively, we must be prepared to keep him in front of us, eliminate paint touches, and take away face cuts while maintaining awareness of his movement without the ball.

RIGHTY **SENIOR** — 8.1 PPG — **BALL HANDLER - 3PT**

#10 Micah Jackson **6'1** — 57% FT — KEEP HIM IN FRONT - BE PHYSICAL - CONTEST SHOTS

He is a lanky guard who plays both on and off the ball and will occasionally handle the point guard responsibilities. 69.2% of his field goal attempts have come from three-point range, where he is shooting 34% from the perimeter, and he is also averaging 2.8 rebounds per game. He moves well without the basketball and is capable of catch-and-shoot opportunities from the outside, but will also use the dribble to create space for perimeter shots. At times he can over-dribble, which can slow down the offense. When attacking the rim, he does not finish well through contact, often relying on a floater, and he will occasionally spin back to his right when driving. Defensively, we must be physical with him, keep him in front, and contest his outside shots to prevent him from getting into a rhythm.

RIGHTY **JUNIOR** — 9.0 PPG — **DRIVE FIRST GUARD**

#3 Seth Wilkerson **6'2** — 69% FT — KEEP HIM IN FRONT - BE PHYICAL - ELIMINATE PAINT TOUCHES

Seth can be pressured into turnovers and does not have strong handles, which allows defenders to speed him up and force him into low-percentage shots. He will leak out in transition looking for easy scoring chances and moves well without the ball in half-court action. On the season, 15.8% of his field goal attempts have come from three-point range, where he is shooting 34% from three, so we still need to be ready to contest his outside shots.

When attacking off the dribble, Seth primarily wants to finish going to his right. He does not play off two feet, does not finish well through contact at the rim, and will often rely on a floater rather than trying to power through defenders. He is also averaging 2.8 rebounds per game. Defensively, we need to be physical with him, eliminate paint touches, and contest outside shots while using pressure to speed him up and make him uncomfortable.
