Saint Edward High School vs. Westerville Central	1/30/2026	Prepared by: Coach Donelon

Westerville Central enters our contest with an overall record of 5–11 and is coming off a 53–44 loss last night to Grove City. While they are one of the smaller teams we have played, they are extremely scrappy and will compete and get after it for four quarters. Offensively, expect a steady dose of drive-and-kick basketball, along with flare action, weak-side staggered screens, horns action, rub action, middle ball screens, and slot ball screens as they look to create advantages and open looks. Defensively, they are primarily man-to-man and will look to switch, so we must be prepared to move the ball via the pass, play with pace and purpose, and hunt slips when switching opportunities present themselves. They are capable shooters from the outside, which means we must close out under control and be ready for long rebounds. They are not a strong rebounding team, and this is an area where we need to insert our will, control the glass, and impose our physicality. Bottom line: bring the edge, bring the toughness, and show Columbus basketball that the state runs through St. Edward High School.

Favorite Sets	Last 2 Minute Sets/ Special Situations
DRIVE AND KICK	BLOB - BOX - S+S
HORNS ACTION	BLOB - BOX - DOUBLE TO SINGLE
FLARE ACTION	BLOB - BOX TO PIN TO BACK SCREEN
MIDDLE AND SLOT BALL SCREENS	MIDDLE BALL SCREEN AND SLOT BALL SCREEN
WEAK SIDE STAGGER	DRIVE AND KICK
RUB ACTION	RUB ACTION

Offensive Tendencies	Defensive Tendencies
3PT SHOOTING - 41% 3PT	PRIMARILY LOOKING TO PLAY MAN TO MAN IN THE HALF COURT

STARTERS

RIGHTY			SOPH	7.6 PPG	HIGH VOLUME 3PT	
#2 Logan Frazier	6'1			87.5% FT	RUN HIM OFF LINE - CONTEST OUTSIDE SHOTS	

Through seven game films, he has displayed a perimeter-oriented offensive profile, with 56% of his field-goal attempts coming from three-point range, where he is shooting an efficient 45% from beyond the arc. He is primarily a catch-and-shoot threat from the outside, consistently spacing the floor, but when necessary he will use the dribble to create space for his shot. Off the dribble, he shows scoring versatility, including a mid-range pull-up, turnaround jump shot, and the ability to finish with a floater in the lane. Around the rim, he can finish with either hand and will occasionally use a crow hop to gather and score, though he does not finish well through contact. He is a solid ball handler with a good ability to change speeds, but he can over-dribble at times, creating opportunities to apply pressure. Defensively, we must contest his outside shots, keep him in front, and limit his paint touches, forcing him into tough, contested attempts and preventing him from getting into an offensive rhythm.

RIGHTY			SENIOR	4.8 PPG	DRIVE 1ST WING	
#0 Tyler Gooden	6'0			65% FT	LIMIT PAINT TOUCHES - KEEP IN FRONT	

Through the seven games of film reviewed, the player has not attempted many shots from beyond the arc and is currently 0-for-2 from three-point range, indicating that perimeter shooting is not a primary strength or focus of his game. He is best described as a drive-first guard who consistently looks to attack the basket off the dribble, using an explosive first step to gain separation and pressure the rim.

In addition to his ability with the ball, he moves well without the ball, showing good awareness and timing when cutting hard to the rim, which allows him to capitalize on defensive breakdowns and over-help. Defensively, our emphasis must be on physicality and discipline—we need to keep him in front, take away straight-line drives, and eliminate paint touches to limit his effectiveness and prevent him from getting into a rhythm attacking the basket.

RIGHTY			SENIOR	16 PPG	SCORER	
#3 Mason Gooden	6'0			82.8% FT	KEEP IN FRONT - LIMIT PAINT TOUCHES	

Through seven games of film, he has demonstrated a true scorer's mentality, consistently looking to impact the game at all three levels. Thirty-eight percent of his field-goal attempts have come from three-point range, and he is converting at an efficient 51% from beyond the arc, showing confidence and range as both a catch-and-shoot threat and a shooter off the dribble. He is comfortable pulling up from the mid-range and has the ability to finish at the rim with either hand, often using a floater to score over length.

In transition, he will leak out and look to score early, making it critical to locate him quickly and eliminate easy run-outs. Defensively, he is an active on-ball defender who applies pressure and will pick pockets if the ball is exposed. To be successful against him, we must identify him early in transition, be physical, contest his perimeter shots, and keep him in front, limiting his ability to get downhill and find rhythm scoring opportunities.

RIGHTY			FRESH	5.5 PPG	HIGH VOLUME 3PT	
#5 Landon Cantrell	6'3			66.7% FT	RUN HIM OFF LINE - CONTEST OUTSIDE SHOTS	

He is a stretch forward who consistently spaces the floor, with 66% of his field-goal attempts coming from three-point range while shooting 43% from beyond the arc, making him a legitimate perimeter threat. He does a good job moving without the ball, relocating to find open catch-and-shoot opportunities, and is active on the glass on both ends of the floor. He is also capable of knocking down the mid-range jump shot and will operate from the right block, where he looks to face up or attack baseline. Defensively, we must be physical with him, run him off the three-point line, and consistently contest all outside shots to prevent him from finding a rhythm.

RIGHTY			SENIOR	10.3 PPG	POST	
#1 Matt Brett	6'3			0% FT	WALL UP - KEEP OFF GLASS	

He is an undersized post player who can stretch the floor, with 37% of his field-goal attempts coming from three-point range. While he is capable of knocking down the perimeter shot, he is most effective when attacking the basket. He scores on drives to the rim, often benefiting from drive-and-dump opportunities, and shows the ability to finish going either left or right. He also has a reliable mid-range pull-up off the dribble, frequently stopping on a dime to create space for his jumper. Off the ball, he moves well and looks to find gaps in the defense, making him a consistent scoring threat.

Defensively, we must play physical with him, contest all outside shots, and keep him off the glass. Limiting his paint touches will be key, as he becomes far less effective when forced to operate away from his comfort areas.

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#14 - #10	

STARTERS

RIGHTY			FRESH	5.3 PPG	DRIVE 1ST GUARD	
#14 Justus Barrett	5'11			60% FT	LIMIT PAINT TOUCHES - KEEP HIM IN FRONT	

Over the seven games of film reviewed, 33% of his field goal attempts have come from three-point range, where he is shooting 33% from beyond the arc. He is capable as both a catch-and-shoot threat and shooting off the dribble from the perimeter, making him a scorer we must account for outside. Offensively, he looks to attack off the bounce and has the ability to drive and finish with either his left or right hand at the rim. However, he can get out of control at times on his drives and does not finish well through contact in the paint. Defensively, our focus must be to keep him in front, apply physical on-ball pressure, and limit his paint touches, forcing him into contested finishes rather than allowing clean driving lanes.

RIGHTY			JUNIOR	3.3 PPG	DRIVE 1ST FORWARD	
#10 Liban Mohammud	6'5			20% FT	KEEP OFF GLASS - LIMIT PAINT TOUCHES	

He is a high-energy big who plays with a relentless motor on both ends of the floor. Over the 7 games of film, he has not attempted a three-point shot, as his offensive impact comes almost exclusively in and around the paint. He consistently scores off drive-and-dump-offs, hard rolls to the rim, and second-chance opportunities. From the right block, he looks to attack baseline, and when he puts the ball on the floor, he prefers to drive right. He is effective as a screen-setter, creating advantages for ball handlers and putting pressure on the defense as he rolls.

On the glass, he is extremely active, generating extra possessions with his effort and physicality. Defensively, it is critical that we be physical with him, keep him in front, and limit his paint touches. Winning the battle on the boards and preventing easy finishes at the rim will be key to neutralizing his impact.
