Saint Edward High School vs. Warrensville Heights	12/30/25	Prepared by: Coach Donelon

Warrensville Heights enters the contest with an overall record of 3–3. Offensively, the Tigers utilize a 4-out, 1-in motion offense, incorporating UCLA screens, flare action, and dribble handoffs to create scoring opportunities. They look to push the ball in transition, do a good job of getting to the foul line, and average around 20 three-point attempts per game.

Defensively, Warrensville Heights primarily plays aggressive man-to-man, applying pressure and jumping passing lanes. However, their transition defense can be exploited by pushing the ball and finding the rim runner early. To come out on top, we must eliminate mental mistakes, value every possession, and continue to pass up good shots for great shots, while maintaining the discipline and execution that have been key to our success.

Favorite Sets	Last 2 Minute Sets/ Special Situations
4 out 1 in Motion	BLOB - 1-4 low S+S
DHO to Middle Ball Screen	BLOB - Box - S+S
Flare Action	4 out 1 in Motion
UCLA Screen	DHO to Middle Ball Screen
1-4 Push guard thru weakside stagger	

Offensive Tendencies	Defensive Tendencies
Motion offense	Primarily will look to play man to man in the half court
Will look to use UCLA Screen and FLARE Screen	Have shown a little 2-3 zone - MIDLE IS WIDE OPEN
Do a very good job of getting to the foul line	Have shown some man to man full court pressure
Will take almost 20 3 point attempts per game	DHO - Switch
Shooting 36.4% from 3pt	Middle Ball Screens - Have swtiched and blitzed
Active on the offensive glass	Slot ball screens - Look to go under or blitz at times

Strengths	Weaknesses
Solid PG play	Transition Defense - Getting below the line of the ball
Athletic	Weakside Rotations
Active on ball defense - Will get right up in your face	Will force up some poor shots at times
Active on the glass	Can be sped up into turnovers
Ability to get to the foul line	Not a great 3 point shooting team

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
12/28	Lutheran East	60 - 38 L			
12/18	Cleveland JFK	81 - 56 W			
12/17	Central Catholic	87 - 78 W			
12/12	Bedford	51 - 47 L			
12/9	Maple Heights	70 - 34 W			

Keys To Victory		
	TRANSITION DEFENSE	WEAK SIDE ROTATIONS
	ELIMINATE OFFENSIVE REBOUNDS	PRESSURE THEM INTO CARELESS TURNOVERS
	NO STRAIGHT LINE DRIVES/MIDDLE	PLAY WITH HIGH ENERGY

Thoughts for the game

DO THE LITTLE THINGS

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#4 - #5 - #10	#11 - #3 - #12 - #2 - #15

STARTERS

RIGHTY — **SENIOR**

#11 Nicholas Parker — **5'11**

Combo guard who will slide into the point guard role at times. He has decent handles but can become careless with the ball, making it important to apply pressure without fouling. He is a drive-first guard who is capable of finishing through contact at the rim and will also utilize a floater in the lane. He looks to leak out in transition and moves well without the ball, consistently cutting hard to the rim. He is a capable catch-and-shoot threat from the perimeter—do not let him get hot from outside. Additionally, he is active and effective on the glass.

RIGHTY — **JUNIOR**

#3 Jaylen Billingslea — **5'10**

This is a quick, physical guard who must be located early in transition, as he looks to attack before the defense is set. He moves well without the ball, consistently cutting hard to the rim and finding scoring opportunities through activity. Off the dribble, he will use a Euro step to finish and has shown the ability to finish through contact, going left or right, though he prefers finishing to his right. He is also a catch-and-shoot threat from the perimeter with deep shooting range, making him dangerous both on and off the ball.

RIGHTY — **JUNIOR**

#12 Kaysnawn Myers — **6'1**

He is a scrappy guard who brings energy and toughness on both ends of the floor. Defensively, he provides solid on-ball pressure, but he will gamble for steals, which can open him up if attacked with discipline. Offensively, he is a drive-first guard who is most comfortable attacking to his RIGHT—we must FORCE HIM LEFT and keep him out of his comfort zone. He can be sped up into careless turnovers and has a tendency to force bad shots when pressured. He moves well without the ball, actively cutting to the rim, and will use a floater to finish in the paint. However, he does not finish well through contact, making physical, disciplined defense effective

RIGHTY — **JUNIOR**

#4 Jayden Nellemsbey — **6'3**

He is a stretch forward who is comfortable stepping out and catching and shooting from the outside, as well as pulling up for a mid-range jumper off the dribble. He will often fall back on his jumper, so defenders must crowd him and be ready to run him off the line. Around the rim, he will use a floater to finish and tends to avoid contact on drives. From the right block, he looks to attack baseline, showing good patience and feel by finding gaps in the defense and making dump-off passes. He is also active on the glass, creating extra possessions with his effort.

RIGHTY — **SENIOR**

#5 Jalen Gum — **6'6**

Physical, interior-oriented post player who is not looking to shoot from the outside. Operates effectively from the high post, where he looks to square up and drive right, using his strength to bully defenders. On the right block, he prefers to fake middle and attack the baseline, while on the left block he looks to attack middle. He looks to score off drives and dump-offs and is very active on the offensive glass, generating second-chance points through put-backs.

BENCH

RIGHTY — **SENIOR**

#2 Camden Hill — **6'2**

He is an aggressive guard who will look to attack going right when driving to the rim and is comfortable pulling up for a mid-range jump shot off the dribble. He will leak out in transition looking for easy scoring opportunities. Offensively, he is primarily a catch-and-shoot threat from the perimeter, but he will also shoot off the dribble if given space. Defensively, we must close out hard, contest every shot, and make him uncomfortable, while forcing him left on all drives.

RIGHTY — **SOPH**

#10 La'Trell Gue — **6'1**

He is a weak guard that we need to be physical with from the opening tip. He is quick and will leak out in transition, so he must be located early. Offensively, he is a drive-first guard who wants to finish primarily going RIGHT at the rim—force him LEFT and make him uncomfortable with contact. From the perimeter, he is mainly catch-and-shoot, featuring a low and slow release, so we must close out hard and crowd him. Overall, physicality, ball pressure, and taking away his right hand are key to disrupting his effectiveness.

RIGHTY — **FRESHMAN**

#15 Marlin Jackson — **5'9**

This freshman guard is small and physically weak, and we must be physical with him on both ends to wear him down. He has decent handles and plays with a shooter's mentality, looking to catch and shoot from the perimeter whenever given space. He has not shown the ability to finish through contact, as he primarily relies on a floater when attacking the rim. Defensively, we must run him off the line, pressure the ball, and make him uncomfortable throughout the game by crowding his space and forcing him into tough, contested decisions.
