Saint Edward High School vs. Max S. Hayes	3/3/2026	Prepared by: Coach Donelon

Max S. Hayes High School enters our contest with an overall record of 3-13 and 3-7 in the Senate League. Offensively, they look to generate scoring through drive and kick action, ISO action, and back door cuts. They also run DHO into ball screen, 1-4 low to ball screen, and 1-4 high to back screen sets. We must be disciplined, communicate through screens, and eliminate paint touches. Defensively, they have shown man-to-man in the half court, but we should expect a heavy dose of their 2-3 zone, including 2-3 versus BLOB. Their zone has shown poor rotations, they will zone off and go under middle ball screens, and at times will randomly trap the ball. We need to attack gaps, move the ball, and play inside-out with poise. Most importantly, we must respect our opponent by not taking any possessions off and play for four quarters. Show them what St. Edward Basketball is about — play with poise, pride, and swagger.

Favorite Sets	Last 2 Minute Sets/ Special Situations
DRIVE AND KICK	BLOB - LINE
ISO ACTION	BLOB - BOX
BACK DOOR ACTION	1-4 LOW TO BALL SCREEN
DHO TO BALL SCREEN	ISO ACTION
1-4 LOW TO BALL SCREEN	
1-4 HIGH TO BACK SCREEN	

Offensive Tendencies	Defensive Tendencies
13.2 3PT ATTEMPTS PER GAME	HAVE SHOWN MAN TO MAN IN THE HALF COURT
SHOOTING 21.2% FROM 3PT	WILL SHOW 2-3 ZONE - POOR ROTATIONS
6.2 FTA PER GAME	MIDDLE BALL SCREEN - ZONE OFF AND UNDER
SHOOTING 38.7% FT	RANDOMLY WILL TRAP TO BALL WITH NO PURPOSE
7.2 OFFENSIVE REBOUNDS PER GAME	2-3 ZONE VS BLOB

Strengths	Weaknesses
PLAY HARD REGARDLESS OF SCORE	TRANSITION DEFENSE
OFFENSIVE REBOUNDING	SHOT SELECTION
	SIZE - ONE OF THE SMALLEST TEAMS WE WILL PLAY
	NO BENCH DEPTH & PRODUCTION
	GUARD PLAY - CAN BE FORCED INTO TURNOVERS

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
2/19	Collinwood	52 - 48 W			
2/17	North Royalton	69 - 28 L			
2/13	Hawken	64 - 39 L			
2/11	Andrews Osborne	69 - 42 L			
1/29	John F. Kennedy	79 - 46 L			

Keys To Victory		
	TRANSITION DEFENSE	OWN THE GLASS
	KEEP THEM IN FRONT	PRESSURE THEM INTO CARELESS TURNOVERS
	NO STRAIGHT LINE DRIVES/MIDDLE	PLAY WITH HIGH ENERGY AND SWAG

STARTERS

RIGHTY			SENIOR	1.8 PPG		
#5 Harlem Gaines	**5'9**			0% FT		

Through five game films, he has shown a clear shot distribution tendency, with 41% of his field goal attempts coming from three-point range. However, he is currently shooting just 14% from beyond the arc, indicating inconsistency from the perimeter despite his willingness to take those shots. In all five films evaluated, he has strictly driven right to finish at the rim and has not shown a desire to attack going left. He does not look comfortable going left and consistently works back to his right hand when putting the ball on the floor. Off the dribble, he will utilize a mid-range pull-up jumper, and when he gets into the paint, he prefers to use a floater to finish at the rim rather than playing through defenders. He does not finish well with contact, which limits his effectiveness when contested around the basket. Defensively, we must be prepared for him to shoot from the outside despite his low percentage. The emphasis needs to be on eliminating paint touches, forcing him left, and contesting all perimeter attempts. Make him uncomfortable by taking away his right hand and shrinking the floor.

RIGHTY			SOPH	4.6 PPG		
#4 Isaiah Aaron	**5'9**			57.1% FT		

Quick, slender-framed guard who plays with pace and confidence. Approximately 23% of his field goal attempts come from three-point range, but he is shooting just 20% from 3PT, so we can live with contested perimeter shots. He has a tendency to fall back on his jumper, especially on pull-ups off the dribble, which impacts his balance and efficiency. He is at his best attacking off the bounce, with the ability to drive left or right to finish at the rim, and he will use a floater when help steps up in the lane. While he is quick and can create space, his slender frame allows us to be physical with him and disrupt his rhythm. We must keep him in front, eliminate paint touches, and be physical throughout to take away his driving lanes and force tough, contested shots.

RIGHTY			JUNIOR	7 PPG		
#1 Noah Robinson	**5'10**			66.7% FT		

In film, 50% of his field goal attempts have come from the three-point line, where he is currently shooting 20% from deep. While he is willing to take perimeter shots, the percentage indicates we must contest but can live with challenged attempts. He is averaging 3.6 rebounds per game and will contribute on the glass from the guard position. Off the dribble, he is comfortable getting to a mid-range pull-up and will also use a floater to finish in the lane. He is a slower guard overall and does not finish well through contact at the rim. When he drives, he prefers to finish going to his right. Defensively, we need to force him left, keep him in front, eliminate paint touches, and contest his outside shots under control.

RIGHTY			JUNIOR	6.4 PPG		
#3 Eddy Dwey	**6'2**			33.3% FT		

He is primarily an interior presence who operates effectively on both blocks. On the left block, he looks to attack middle, while on the right block he is aggressive attacking baseline and will even fake middle before driving baseline to create an angle. When putting the ball on the floor, he prefers to finish going to his right hand. He is comfortable stepping into a mid-range jump shot off the dribble, particularly from the short corner area. From a perimeter standpoint, only 12% of his field goal attempts have come from three-point range, and he is currently shooting 0% from three, indicating he is not a perimeter threat and does most of his damage inside the arc. He is active and physical on the glass, averaging 5.2 rebounds per game, and consistently looks to generate second-chance opportunities. Defensively, the emphasis must be to eliminate paint touches, keep him off the glass, and wall up without fouling. Limit his ability to establish deep post position and force him into contested shots over length.

RIGHTY			SENIOR	1.6 PPG		
#11 RZ Hill	**6'2**			50% FT		

In the film reviewed, 21% of his field goal attempts have come from the three-point line, where he is shooting 33%. He is capable of knocking down catch-and-shoot threes if left wide open, so we must be prepared to contest with discipline. He also shows comfort in the mid-range area, utilizing a pull-up jump shot off the dribble when defenders close out too aggressively. When attacking the rim, he will primarily look to drive to his right and has shown the ability to finish with a floater in the lane. On the right block, he is effective attacking baseline or facing up to create his own shot. He averages 3 rebounds per game and is active on the glass, pursuing second-chance opportunities. Defensively, our emphasis must be keeping him off the glass and eliminating second shots. We need to wall up at the rim, take away his right-hand drives, and contest without fouling while staying disciplined on closeouts.

BENCH

RIGHTY	SENIOR	1.5 PPG	HIGH VOLUME 3PT SHOOTER	
#13 Jonathan Otero 5'5		NO ATT	FORCE HIM LEFT - CONTEST HIS SHOT	

In the film reviewed, 42% of his field goal attempts have come from three-point range, and he is currently shooting 33% from beyond the arc. He is comfortable as both a catch-and-shoot threat and shooting off the dribble from outside. He will also utilize a mid-range pull-up off the dribble when defenders close out aggressively. Off the bounce, he primarily looks to attack right to finish at the rim and will use a floater in the lane. However, he does not finish well through contact and can be disrupted by physical play around the basket. Defensively, we need to force him left, eliminate his preferred driving lane, and consistently contest his outside shots to limit his rhythm and efficiency.

LEFTY	JUNIOR	1.2 PPG	DRIVE 1ST GUARD	
#2 Daveon Rodgers 5'10		0% FT	FORCE HIM RIGHT - ELIMINATE PAINT TOUCHES	

In the film evaluated, 12% of his field goal attempts have come from three-point range, and he is currently shooting 0% from beyond the arc. He is not a consistent perimeter threat and is far more comfortable operating inside the arc. Off the dribble, he looks to pull up for a mid-range jump shot, particularly when defenders give ground. When attacking the rim, he prefers to finish going to his left. He tends to play out of control on drives, especially when pressured, which can force him into difficult, low-percentage shots. Defensively, our emphasis must be to keep him in front at all times, eliminate paint touches, and make him finish over length in contested situations. Discipline and physicality will be key to limiting his effectiveness.

RIGHTY	SOPH	3.5 PPG	HIGH VOLUME 3PT SHOOTER	
#10 Javier Rodriguez 5'10		50% FT	FORCE HIM LEFT - CONTEST HIS SHOT	

He is a quick guard, especially dangerous in the open court, where his speed allows him to create advantages in transition. In the film evaluated, 52% of his field goal attempts have come from the three-point line, though he is currently shooting just 11% from three. He is a catch-and-shoot threat from the perimeter and will step into open shots confidently, so we must be prepared to contest on the catch. Off the bounce, he is primarily looking to attack right when driving to the rim. He will use a floater to finish over help defenders and is more comfortable scoring when he can get downhill to his right hand. Defensively, our emphasis must be to force him left, keep him in front, and eliminate straight-line drives. We need to apply controlled pressure, stay disciplined in gaps, and contest all outside shots while taking away paint touches.

RIGHTY	JUNIOR	3.8 PPG	STRETCH FORWARD	
#21 Amarr Brooks 6'2		NO ATT	NO FACE CUTS - KEEP IN FRONT - CONTEST SHOTS	

He is a versatile scoring threat with 33% of his field goal attempts coming from three-point range, where he is currently shooting an efficient 50% from beyond the arc. He is a reliable catch-and-shoot player from the perimeter, and we must be prepared to contest his outside shots at all times. Offensively, he scores effectively on drive-and-dump-offs and does a solid job moving without the basketball to create scoring opportunities. From the right block, he looks to attack baseline, while on the left block he has primarily faced up and attacked middle. Although he is capable of finishing at the rim, he does not finish well through contact, which presents an opportunity to be physical. He is averaging 3 rebounds per game and will pursue opportunities around the basket. Defensively, our emphasis must be to not allow face cuts, keep him in front, and consistently contest outside shots to limit his efficiency.
