Saint Edward High School vs. Lutheran West	2/17/2025	Prepared by: Coach Donelon

Lutheran West enters our contest with an overall record of 10–9 and will provide a disciplined challenge on their home floor. Offensively, they are looking to score in transition and push tempo for early opportunities. In the half court, they run motion offense with hit-and-screen-away action, slot and middle ball screens, and elevator action to free shooters. Transition defense and communication through screening actions will be key. Defensively, they primarily play man-to-man but will mix in 2–3 and 1–3–1 zone, trapping out of the 1–3–1. They have switched slot ball screens and have shown zone principles, hard hedge and fight-over coverage on middle ball screens. They have blitzed and switched DHO actions, will front or high-side the post, and show some 2–2–1 full-court pressure. We have been at home for a long stretch, and this must be treated like a true playoff road game. Be prepared to compete for four quarters. We must own the glass, take care of the ball, and play with pride and swagger.

Favorite Sets	Last 2 Minute Sets/ Special Situations
MOTION OFFENSE	BLOB - 4 HIGH
HIT - SCREEN AWAY	BLOB - FLAT 3 ACTION
SLOT BALL SCREEN	BLOB - BOX TO DOUBLE
MIDDLE BALL SCREEN	MOTION OFFENSE
ELEVATOR ACTION	HIT - SCREEN AWAY
	ISO DRIVE

Offensive Tendencies	Defensive Tendencies
PRIMARILY LOOKING TO RUN MOTION - HIT - SCREEN AWAY	PRIMARILY WILL PLAY MAN TO MAN IN THE HALF COURT
RELY ON SPACING AND DRIVING THE BALL	2-3 ZONE
TURN INTO ISO DRIVERS	1-3-1 ZONE - WILL TRAP TO THE BALL
3PT - 36%	SLOT BALL SCREEN - HAVE SWITCHED
13 3PT ATTEMPTS PER GAME	MIDDLE BALL SCREEN - ZONE AND OVER/ HARD HEDGE AND FIGHT OVER
15 FREE THROW ATTEMPTS PER GAME	DHO - HAVE BLITZED AND SWITCHED
68% FREE THROW	POST DEFENSE - FRONT OR HIGH SIDE
7.3 OFFENSIVE REBOUNDS	WILL SHOW SOME 2-2-1 FULL COURT PRESSURE

Strengths	Weaknesses
	BENCH DEPTH - PRODUCTION
	SIZE
	GUARD PLAY TRANSITION
	DEFENSE - GETTING BELOW LINE OF BALL
	REBOUNDING
	ILL ADVISED SHOTS

LAST FIVE GAMES

Date	Opponent	Score	Leading Scorer	Leading Rebounds	Leading Assists
2/13	University School	81 - 70 L			
2/10	Streetsboro	58 - 38 W			
2/7	Warren JFK	61 - 40 W			
2/6	Lutheran East	58 - 47 L			
2/1	Chartiers Valley	60 - 53 L			

Keys To Victory		
	TRANSITION DEFENSE	OWN THE GLASS
	KEEP THEM IN FRONT	PRESSURE THEM INTO CARELESS TURNOVERS
	NO STRAIGHT LINE DRIVES/MIDDLE	PLAY WITH HIGH ENERGY AND SWAG

#4 - #1	#11 - #0 - #35

STARTERS

RIGHTY			SENIOR	7.7 PPG	SCORING GUARD	
#11 Jordan Custis	5'8			72.7% FT		

The player is a dynamic offensive guard who presents multiple scoring challenges. Eighteen percent (18%) of his field goal attempts come from the three-point line, and he is currently shooting 40% from three, making him a legitimate catch-and-shoot threat from the perimeter. He is comfortable spotting up and must be accounted for at all times beyond the arc. He demonstrates good court vision and solid handles, allowing him to create for himself and others. Off the bounce, he has the ability to finish going left or right at the rim, though he is not as efficient attacking to his left. He frequently spins back to the middle when cut off and shows advanced finishing moves, including the use of a Euro step and crow hop to navigate through traffic. He is capable of finishing through contact and will also utilize a floater when rim protectors step up. Defensively, our emphasis must be clear: eliminate paint touches, locate him early in transition, and keep him in front of us. We cannot allow him to collapse the defense or get downhill where he becomes most effective. Containing dribble penetration and forcing contested perimeter shots will be critical to limiting his impact.

RIGHTY			JUNIOR	4.7 PPG	DRIVE 1ST GUARD	
#4 Marquis Capers	6'1			46.2% FT	ELIMINATE PAINT TOUCHES - KEEP IN FRONT	

He is a drive-first guard whose primary objective is to attack the rim off the bounce. In the six games of film reviewed, he has not attempted a single mid-range jumper or three-point shot, making him a strictly downhill player who is looking to get into the paint every possession. He wants to finish going to his right hand, consistently working to create angles that allow him to attack that direction. Around the rim, he shows good body control and creativity, often using a euro step or crow hop gather to finish through traffic and around shot blockers. He is also very good at moving without the basketball, cutting hard to the rim when defenders lose vision or over-help. In addition, he is extremely active on the glass for a guard, averaging 4.8 rebounds per game, and will pursue long rebounds that can immediately trigger transition opportunities. Defensively, the emphasis must be clear: eliminate paint touches and keep him in front of us. We need strong containment, disciplined gap help, and to shade him left to take away his preferred right-hand drives. The goal is to force him into becoming a perimeter shooter and make him uncomfortable by limiting his downhill lanes.

RIGHTY			SENIOR	11.5 PPG	HIGH VOLUME 3PT	
#0 Chase Kuszmaul	6'3			76.5% FT	CONTEST HIS SHOTS - MAKE HIM DRIVER	

In the six games of film we have, 62% of his field goal attempts are from three, and he is shooting 35% from beyond the arc. He is primarily a catch-and-shoot threat who moves well without the ball, but he will use a dribble to create time and space. He can score off the bounce with a mid-range pull-up and will use a floater or crow hop to finish, often looking to avoid contact at the rim. He can be sped up and forced into ill-advised shots.

We must contest all perimeter shots and make him a driver. Take away rhythm threes and force him to finish over length and traffic.

RIGHTY	SENIOR	9 PPG	HIGH VOLUME 3PT		
#1 Dom Burns	6'0	57.1% FT	CONTEST HIS SHOTS - BE PHYSICAL		

Over six games of film, 59% of his field goal attempts have come from three-point range, and he is shooting an efficient 48% from three. He is primarily a catch-and-shoot perimeter player who looks to space the floor and score from the outside. We must contest all outside shots and take away his rhythm.

Off the dribble, he will go to a mid-range pull-up, especially if he goes left or spins back left. He does not finish well through contact at the rim, is physically weak, and does not crash the glass. We need to be physical with him, disrupt his catches, and force him to score inside over length and contact.

RIGHTY	JUNIOR	10.8 PPG	POST		
#35 Aiden Monroe	6'6	78.6% FT	WALL UP - KEEP OFF GLASS		

Over the six games of film studied, 26% of his field goal attempts have come from three-point range, where he is currently shooting 27%. He is averaging 3.2 rebounds per game and is active on the glass on both ends. From the left block, he looks to attack middle but has shown the ability to drop step and finish baseline. On the right block, he primarily looks to attack baseline and will spin back baseline if cut off. He will drop his shoulder on drives and try to bully defenders to create space. He is comfortable knocking down a mid-range jump shot around the free-throw line extended area and will catch and shoot from the perimeter if left open.

Defensively, we need to wall up, keep him in front, and keep him off the glass.

Thoughts for the game

GUYS TO FOUL IN LATE GAME SITUATION	GUYS TO AVOID FOULINIG
#20 - #12	#2

BENCH

RIGHTY — SENIOR — 4.5 PPG — **DRIVE 1ST GUARD**

#2 Josiah Davis 6'1 — 71.4% FT — ELIMINATE PAINT TOUCHES - FORCE LEFT

He is a drive-first guard who looks to attack the paint early and often. Through six games of film, 18% of his field goal attempts have come from three-point range, and he is currently 0-4 from three, indicating he is not looking to hurt you from the perimeter. His primary focus is getting downhill. He is most comfortable attacking from the right block and driving baseline, and he clearly prefers to finish going to his right. Watch for him to spin back to his right when cut off. If defenders sag too much, he will take an open mid-range jump shot, but that is secondary to his drive. He also tends to leak out in transition looking for easy opportunities. Defensively, we must be disciplined. He can be sped up into careless turnovers, so applying pressure without fouling is key. The emphasis needs to be: eliminate paint touches, keep him in front of us, and force him left.

RIGHTY — JUNIOR — 3.8 PPG — **3 PT SHOOTER**

#20 Jad Eid 5'10 — NO ATT — CONTEST HIS SHOTS - NO FACE CUTS

He is a role player who will likely see limited action. Through the film reviewed, 18% of his field goal attempts have come from three-point range, where he is shooting 50% (1 of 2). While the volume is low, he is capable of knocking down open perimeter shots.
He is not very physical and will look to leak out in transition rather than mix it up inside. He moves well without the ball and looks to find open space along the perimeter. Defensively, we need to contest his outside shots, eliminate face cuts, and be physical with him to prevent easy catches and rhythm opportunities.

RIGHTY — JUNIOR — 1.3 PPG — **DRIVE 1ST FORWARD**

#12 Jayden Taylor 6'5 — NO ATT — NO FACE CUTS - FORCE LEFT

Long, lanky forward with limited offensive production. Through six games of film, only 11% of his field goal attempts have come from three, and he is currently 0-1 (0%) from beyond the arc. He is a drive-first forward who prefers to attack going to his right and look to finish at the rim. However, he does not finish well through contact and can be bothered by physical defenders. Defensively, we must eliminate face cuts, be physical early, and take away paint touches. Force him left and make him score over length and pressure rather than allowing straight-line drives to his strong hand.
